

# Lower Cassette Replacement

## Twin Belt Barriers

### Components

2" Diameter Cassette

3" Diameter Cassette

Phillips Screwdriver (not supplied)

**STEP 1**

Remove the four screws securing the top section of the post.

**STEP 2**

Lift off the top section of the post.

**STEP 3**

Loosen the four screws securing the cassette into the post.

**STEP 4**

Slide the cassette out of the post.

**STEP 5**

Loosen the lower screws slightly on the replacement cassette but do not remove them completely. Do not loosen the top screws.

**STEP 6**

Fit the replacement cassette into the slots in the top of the post and slide all the way down.

**STEP 7**

Tighten the screws securing the cassette into the post. Note: Do not over tighten as this may affect the belt retraction.

**STEP 8**

Replace the top section of the post, refit and tighten the screws.
