

The RollerSafety 300 is ideal for fast and easy set up of long span barriers. This product features a 16'4.9m belt, requiring only half the number of barriers than with the industry standard 7.5'/2.3m belt. And to speed deployment the base is fitted with a 4.5"/114mm roller, simply tilt onto the roller and push using the post head. With a heavy gauge steel post and a solid cast iron base the RollerSafety 300 is designed for tough work environments. The post unscrews from the base so the unit can be stored flat when not in use.
